

About Little Star Foundation

Recognized as children home under section 34(2) of juvenile justice (Care and protection of Children) Act 2000 by Madhya Pradesh state government and Specialized Adoption agency by section 41(4) of juvenile justice (Care and protection of Children) Act 2000 by State Adoption resource authority of Madhya Pradesh Government.

I am very happy to provide a letter of recommendation for Mohammed Arham Rafi.

Alongside my professional duties as a senior technology executive, I am doing my best to give back to society. I am a Director at [Little Star Foundation](#) which has been running a children home for underprivileged girls who are often abandoned after their birth. We have given nearly a hundred girls their best chance in life by giving them home, skills, education and love. I run this foundation with my family members Dr. Samer Choudhary and Dr. Sneha Jain.

Arham has been building the concept of [EcoHub](#) with a mission of empowering communities to recycle smarter and build a sustainable future through innovative solutions and environmental education. Arham offered his support to us in our endeavors.

Arham conducted sessions for the staff and residents of the Children Home in which he gave us several useful tips on running sustainable operations, and how simple day-to-day activities can be conducted in a way that helps the institutes achieve their sustainability goals. We transformed our waste management and re-use/re-cycle practices using the knowledge that Arham provided. Arham also helped us with the technology tools that could track availability of various items in our store, track usage of the items and determine when they had to be replaced. He also helped to classify items which could be reused after some treatments. With these tools, we reduced our cost of operations as we ended up buying new things in lesser quantities and frequencies.

During our engagement, Arham impressed me with his genuine desire to help make a change. He has great attention to detail, and he used that to understand our processes and needs better. He is also very good with technology and using his application development skills, he was able to quickly put together solutions that helped us with our needs. He is hardworking and sincere and would always ensure that he kept us updated on the progress. Overall, it was a delight to work with Arham, and I wish him the very best for his project EcoHub and all his future endeavors.

With best regards,

Ajay Jain
